In this issue of the News begins a series of articles headed "Democracy in America." These should prove of especial interest to young Democratic readers. They will consist of historical facts not usually seen in histories, and if they are read and rmembered, the posessors of the knowledge they contain, will be plenty able to refute any argument produced to the detriment of Democracy. If clipped out and pasted in a scrap-book, they will make a splendid history of the Democratic party in the United States

ADDISON, Ky , Feb. 10th, 1804, BRECKEN-RIDGE NEWS-I was induced to visit Oglesby's farm, near your city, this week. It's a model of econemy in domestic appointments. The proprietor has conceived and executed every detail for the approved management of fine stock. On this farm of model improvements every detail is simple but useful cheap and frugal. I was impressed by the great value of the Silo the high and perfect preservation of food within it and the econemy of its concentrated and preserved condition. I was also impressed with the manner of utilizing his stalk fodder crob by cutting it into fine food and feeding in large box troughs. His mules, seven head, are superb. Of late the neighbors have conceived the idea of converting him into an incubator, providing they can prevail on his mutual friend, the "brother" who "got on a big high" christmas, to furnish the whisky and keep steam up to a certain temperature untill the chickens batch. They are satisfied that if the friend can keep the bachelor's spirits up 'till he hears the chirping from the first setting that nestle around him, there will be no more trouble in getting him to set. The only trouble arising at present is, they are afraid that the mutual friend's appetite for the "crit, ter" will become so great, he will imbibe too freely himself and not keep the bachelor properly stimulated in order that he generate heat sufficient to keep the eggs at the right temperature. I propose that the neighbors take turn about, each man in the neighborhood take a bottle of whisky and stay with him a certain length of time, say a day and night. The experiment will be inallow Ben Current about, for he would steal the eggs and suck them.

William H. Artmann Murders His Wife and Child Near Tell City. Indiana.

Religious Excitement Is the Cause Of His Derangement and the Terrible Tragedy.

JAILED IN CANNELTON.

Tell City, Iso., Feb. 12.-William H. Artmann, a farmer living about six miles northeast of Tell City, about breakfast this morning, killed his wife and oldest son. John Eads and William Naegle were the first to reach the house. They found Artmann lying on the floor with his murdered wife and boy. They first thought that Artmann and his whole family had been foully murdered. But as soon as they entered the house Artmann jumped up and rushed at them like an infuriated wild beast, and it was with great difficulty and danger to themselves that they overpowered him and tied him securely to a board in the sum-

It appears that the family was eating breakfast when the atrocious crime was committed. Artmann, in the presents of his five children, stamped his wife to death. Her body was in a horrible condition. Her left breast was torn off, the collar bone broken, and terribly mangled about the stomach and abdomen. Her left eye was cut out with a pocket-knife.

While this was going on, it seems that the oldest boy, aged twelve years, tried to defend his mother, and he, too, suffered the same fate at the hands of his enraged father. Coroner Labhard and his deputy, H. Nemsgern, found the boy lying across his mother, his arms around her neck. His body was also terribly mangled and his nose and face mashed, showing how he had been stamped to death. The mother's body was found ento the neighbors almost naked and covered with blood.

When the Coroner went to him Deputy Nemsgern, who was well acquaint ed with Artmann, said: "Billy, is that you?" Artmann replied: "Yes; where is my family? I want to see them. When taken in the room where the bodies of his wife and son lay, he looked at them, and, still tied to the board, he said to his wife: "God, Mollie, forgive me for what I have done!"

Mr. Nemsgern asked him whether he committed the deed, and his answer was, 'Yes, Henry, I did. I killed them both.' The bed-clothing and furniture were scattered about the room, showing signs of a terrible struggle. Mrs. Artmann was a Miss Mary Kennedy, from the northern part of the State, and was a refined woman. There were five children, the oldest twelve years of age and the youngest six months. Artmann is about forty years old, six feet four inches in height and at present is a raving maniac. The four children are now with the family of Benjamin Brinksneader, where they fled to escape being murdered with their

mother and brother. Coroner Labhard and a special Constable took charge of Artmann and conveyed him to the county jail at Cannelton, Ind. There is great excitement among the neighbors. Artmann and his brother, some ten years ago, were charged with the murder of a peddler named Henderson, in the same neighborhood. This, however, was never proven, and he has since had a good reputation among his peighbors. The Coroner has not yet rendered his verdict, but all indications
